

### **CarbonFoam PE 35-80-110-160**

CarbonFoam PE grade foams are available now in 2.5/5/7/10 lb densities. CarbonFoam Polyester foam is an ideal substitute for the PET foam, exhibiting substantial mechanical property improvements, retained mechanical properties above 170 F (unlike PET) and full 48X96 sheet sizes (48X48 scored). CarbonCore installed a brand new saw cut foam scoring line to compliment our rotary knife scoring line for added flexibility in thicker cuts. Two different scrim types are available now. As before, we will CNC cut your kits at no additional charge (MOQ apply)

### **HOW WE DO THINGS**

### **CarbonCore Plastic Honeycomb Laminated Panels**

Ever wonder how CarbonCore plastic honeycomb composite laminated panels compare to marine plywood in deflection and weight? Check out this short video for a simple comparison that may surprise you. CarbonCore laminated panels are available from inventory in 1/4"-1" thicknesses and available up to 10'X53' size with standard 17 oz or 34 oz FRP skins. Save about 75 lbs per 4x8 sheet in weight compared to plywood.

### **CarbonCore Fiberglass Reinforcements**

Carbon-Core Corp. is the North American distributor for NMG fiberglass rovings and knitted multiaxial reinforcements. Available materials from stock include 1208-1708-1808-2408-2415 in 45/45 and 0-90 configurations plus closed molding LRTM mats in 300-180-300/450-180-450/600-250-600 and many others. Sold by the pallet at best prices in the USA and most composites distributors in North America.
