

We have moved to our custom built brand new manufacturing and engineering facility in Troy,VA

Built to the latest environmental and efficiency standards, including all LED lighting in office, manufacturing and warehouse areas, solar reflective glass and high efficiency cooling/heating systems.

**HOW WE DO THINGS**

**CarbonBond Transom Compound**

**CarbonBond Ceramic Cast-in Place Transom Compound** offers 700% increase in compression strength as compared to traditional plywood. Click on the instructional video link to learn how easy it is to repair your rotted transom and stringers. Fix your transom in fraction of the time it takes to replace it with rigid sheet materials.

**Sphere Core PSI**

Spherecore PSI is a brand new product, result of several years of development and trials worldwide. Available in 2 and 3 mm thicknesses, designed for LRTM and infusion application. Ultra fast wet-out fiberglass fiber, semi rigid laminar flow media in the center of the laminate provide laminate that substantially reduces resin consumption and increases the cosmetic appearance of the finished parts.
