

## Spherecore Type S

Spherecore laminate bulker Type S is the only laminate bulker made with real fiberglass fiber as opposed to commonly used polyester fiber. This type of fiber allows much faster wetout, eliminating the need to wet-out material outside of the tool plus multiple pieces can be joined together in the lamination process by eliminating the seam line by applying laminating roller pressure to the seam. This material is regularly used to improve surface appearance in open and closed molding.

## HOW WE DO THINGS

### Carbon-Core Corp.

A short video introduction and look behind the scenes to our new manufacturing facility and some of the processes we employ daily to manufacture our quality core materials portfolio. Meet some of our people, see some of our equipment

### Fiberglass Coatings Inc.

CarbonCore Products are distributed in Florida, Georgia and Alabama by FGCI Inc. FGCI is the largest independently owned composites distributor in Florida, serving thousands of customers in diverse industries ranging from marine to amusement to construction, and everything in-between. They are a multi-location company with over 80+ employees, 165,000 square feet of warehousing, and a fleet of delivery trucks.

- Chemists on-staff to create custom product formulations
- Gelcoat color matching, created on-site using our photospectrometer
- Outside sales support and competitive pricing for our resellers
- Private labeling services and toll production
- A technical staff, with years of hands-on experience, available to walk you through the steps and products needed to make your dream project a

reality

- The largest selection of composite materials available

Their product line features a complete inventory of polyester and epoxy resins, gelcoats, fiberglass fabrics, and coring materials, as well as all of the equipment and supplies necessary to achieve your goals, whether a large OEM or a DIY consumer. You'll love their personalized service and the great selection we offer.
